## APPLICATIONS

Prisma is practical, handy and easy to carry. It is ideal for such environments with reduced transit or storage areas such as bars, restaurants, public means of transport, camping sites, bungalows, small offices or shops, public toilettes, stairways and apartments. Thanks to its wide range of snap-in and removable accessories and compartments, Prisma bucket can be transformed into a complete cleaning system, ideal for several purposes: floor wet mopping, surface cleaning, product storage and/or wc cleaning.

## FEATURES

- Strong: made of first quality materias (recyclable 100% polypropylene copolymer), light, atossic, shock-proof , resistant to frequent use and to the low temperatures
- Compact, handy and ergonomic
- Modular: customizable thanks to its wide range of modular accessories and compartments to offer the best solution to your special needs
- Versatile: fitting all floor wet mopping systems with string mops, with mop holder for velcro system and presoaked mops, with mop soaking on site; it can be matched with window and surface cleaning systems, such as Brilliant, Top Clean and Touch cloths
- It is equipped with a cross double handle (PAT PENDING) with snap closure: the two handles can be firmly hooked with a simple click
- The double handle has been designed with specific hollow spaces inside to block vertical handles, thus allowing to carry this space-saving bucket easily, keeping the tools contained in it stable and safe
- Standard pirouetting wheels for an easy transport

## MATERIAL

Polypropylene copolymer
